Hey,

I was there when B&G first came to my room. The missing equipment was supposed to be in the recording studios. When I came back yesterday, it didn't look like B&G bothered the studios. 3 boxes of DJ equipment would be hard to sneak off campus, especially if one doesn't really know the campus. The mini keyboards weren't locked up and would be easier to steal.

Nico was the only person in those rooms that I know of. He wasn't ever assigned a 34 room key, but he locked the studios every afternoon with his unmarked A key. He would hang out in my room until his class started at LACC. Remember, he was issued a second key when he broke his room 33 key. He had just started his steroids. I told Ms Walker that I didn't want him to have another 33 key, so she gave him something else

and I gave him a retractable key chain to wear around his neck. When his mom gave him the A key he showed me the blank key.

Maybe you can find the pieces like you found the wheels and the DJ sets. Sketch and I logged 12 sets. Mr Durazo has 1, and you found 3. There aren't any in the music room.

The wheels were never put away because a parent was going to attach them over the summer. 8 of 10 stations were done as soon as school was out. 1 box is missing and 1 wheel from 1 box was missing. I received
1 wheel from Ms Harris yesterday. Who can attach the wheels for the last 2 stations?

I should have inventory done by the end of next week since you forbade me from being on campus outside of contracted hours.

Sketch confirmed in the email yesterday that all of the electronic equipment was accounted for before he was put out of my program for unauthorized recording of students.

Please let Sketch know that it's the classroom bundle of Orff instruments that is missing. We would know if two 3' bass xylophones had been delivered to our school. I told Mr Butler, who coordinated
the BEAT Lab, last semester that they still hadn't arrived. All of the equipment Sketch ordered was delivered to his workspace and he personally delivered everything to room 33, sometimes with David in a van. I never signed for anything he ordered. I cc'd
Sketch on the email because Nico worked for him at Compton Library, another contract BEAT Lab lost. According to Sketch, they hired another company to fulfill the program after he bought everything they needed.

Also, I met several arts teachers at the Arts training at the Science Center last week. The ones working with Sketch aren't happy with his program either. It seems that I'm not the only teacher that he's been harassing.

Musically yours,

Ω

Subject: Re: Missing Studio equipment

Good afternoon Ms. Bone,

As you know, your room was cleaned over the summer. There were several B&G subs here to assist with summer cleaning. Everything was pulled out of the room and put back to the best of their ability. Items may not be where you left them. If you have not gone through all the boxes in your room, it is possible that the "missing" equipment is in your room in a box. No one was in your room over the summer except me (twice) and the only person with the room key is you, since you did not turn your keys in until today.

There are 4 DJ stations to a box. I have located 3 of the DJ stations. They will be brought to your room tomorrow. Everything else should be in your room, including the wheels. Once you go through everything, if there is something missing, let me know.

Thanks,

Ms. Persons

CAUTION: EXTERNAL EMAIL

Hi Ms. Bone

Not sure why I was copied on this thread, but I will respond to inform everyone you copied on this email.

I'm not sure if you are implying that me or our organization has anything to do with any "missing" equipment mentioned and where you arrive at $5,000 in outstanding equipment. Both allegations are incorrect. We obviously don't have
anything to do with missing equipment. All "electronic equipment" was delivered and received by you and stored in your classroom.

For context, there were 2 equipment invoices...

1. An invoice for electronic equipment . All electronic equipment was received and delivered.
2. An invoice one for music instruments. The item labeled "bundle" on the invoice
was thought to be back ordered, but Guitar Center (GC) said the items were shipped separately.

Re: Music Instruments Invoice - I reached out to GC over the summer and according to their records, the late arriving items that were delivered last semester (and received by you) were the missing items thought to be backordered
from the bundle package.

If you feel there are missing items from the invoice for
"music instruments" (not to be confused with electronic equipment), please send an itemized list to Ms.

Persons.

I am happy to follow up with GC again.

Also, moving forward, please direct any communication or questions that you have for me through Ms. Persons.

Thank you,

SCETCH (no K)
